General Information:

The first series production of the Minor has already begun in the year 1930. As a relatively inexpensive and extremely reliable automobile, the production only stopped in the year 1971. With a top speed of 124 km/h and its low fuel consumption, this classic car still moves with the times. However, our Minor Traveller convinces on another level - The appealing wood applications in combination with the good conditions, allow us to offer a technically solid and really beautiful classic car.
