General Information:

The T 595 was presented for the first time in 1996. With the development of this super sports bike, Triumph primarily targeted the customers of Italian super sports bikes. A revised three-cylinder engine, a bridge frame made of light alloy with a single-sided swingarm were the striking features of the new Daytona. Our T 595 is in very good condition, which is due to the low mileage. With only 2 previous owners and a German first delivery, we can round off our offer.
