General Information:

Our long-standing business friend, author and publisher Andy Schwietzer talks about DKW winning streaks in his two books. One of the reasons for this success was the construction of the so-called charging motor principle. In addition, there were a large number of experts who were able to develop optimal chassis and, of course, the racing drivers who bravely ventured onto the race tracks. Today, we also see the design, which is an additional feature of the UL 500. Thanks to an ingenious tinkerer and restorer, it was possible to offer a complete restoration of the UL 500.
